Collierville, TN 38017 | West Lafayette, IN

EDUCATION

Undergraduate Student at Purdue University, West Lafayette IN

Class of Winter 2027

Major: Computer Science | **Achievements:** Dean's List and Semester Honors

Collierville High School, Collierville TN

Class of 2024

GPA: 4.75 (Weighted) | **Rank:** 15th out of 700

TECHNICAL SKILLS

Java, Python, R, C, C++, JavaScript, Django, NodeJS, Pug, GitHub, VMWare (Windows), UNIX, FIJI and ImageJ, Octave, MATLAB, AI/ML- XGBoost, Random Forest, Polynomial Regression

- **Java I, Java II, and Web Programming using Python** Undergraduate credit from **Harvard Extension School**
- **TestOut PC Pro and TestOut Network Pro** Certification from **University of Memphis**

EXPERIENCE

Data Science Intern | FedEx, Memphis TN

June 2026 – August 2026

Developed a Python-based machine learning forecasting model to predict package volumes using FedEx sorting logic and data. Built an Agentic AI solution using Gemini and Vertex AI for business insight retrieval and AI actions, while contributing full-stack development across the chat UI, backend, web search, and ML integrations using GCP, Databricks, and Azure.

Intern | Sedgwick, Memphis TN

May 2025 - Present

QA Intern at Sedgwick, a global leader in risk, claims, and loss management. Conducted RPA bot testing and authored detailed test plans. Utilized UIPath for automation and Playwright for enterprise applications testing.

Data Mine at Purdue | John Deere

August 2024 – May 2025

Developed a **Python-based ML model** to predict parts demand using **Random Forest, XGBoost**, and custom polynomial regression. Evaluated performance with Root Mean Square Error (**RMSE**) and identified seasonal trends. Worked in an **Agile Kanban** environment under the guidance of Yarong Chen and Gonzalo Martinez from John Deere.

Intern | Roar Labs Inc. (joinroar.co) Mountain View CA

September 2022 – April 2023

Roar Labs helps to empower people in tech careers. My role was a Software Engineer where I worked on **frontend** using **JavaScript, NodeJS, Pug, GitHub**, and Visual Studio Code. I worked under the CEO, Mrs. Anusha Rajan(anusha@joinroar.co).

PERSONAL PROJECTS

RRenderAI | Full Stack Web App

Launched July 2026

Developed <https://www.rrender.ai> an AI creative platform that transforms natural-language prompts into motion graphics, 3D Blender renders, narrated animations, and editable designs using **React, TypeScript, Node.js, Python**, Remotion, Blender, and FFmpeg. Architected production infrastructure including OAuth/OTP authentication, Stripe billing, **PostgreSQL/Prisma**, AI model orchestration, content moderation, telemetry, and Railway deployment.

Guard Command | Full Stack Web App

Launched September 2026

Built <https://guardcmd.ai/>, an abuse protection platform for apps and AI agents that detects exposed auth, AI/LLM, **OTP**, checkout, and **MCP endpoints**. Developed risk scoring, graduated enforcement, prompt injection screening, and agent tool call authorization through a TypeScript SDK, **REST API**, GitHub integration, and **MCP server**.

GetUrSeat | Full Stack Web App

Launched August 2026

Developed and deployed <https://geturseat.com> a production full-stack web application using React, TypeScript, Python, MongoDB, REST APIs, Vercel, and Railway, using end to end frontend, backend, database, and cloud infrastructure.

CLUB ACTIVITY

August 2025 – Present

BoilerMake Outreach Team

Executive Director in Purdue Student Government

Organizer in Purdue Hackers
